Subject Index to Volume 7

Affective disorders
  and assortative mating, 63ff
  and evoked response, 199ff
  predictors of improvement after electroconvulsive therapy, 147ff
Alcohol selection, effects of frontal ablation, 173ff
Amphetamine
  effects on incorporation of carbon atoms of D-mannose, 3ff
  interactions with serotonergic agents, 11ff
Antinuclear factor, 81ff
Antipsychotic medication, single-dose, psychological effects of, 263ff
Anti-S protein
  distribution, 53ff
  mechanism of action, 53ff
Anxiety, and contingent negative variation, 43ff, 101ff
Assortative mating, and affective disorders, 63ff
Aversion to humans, inheritance of, in pointer dog, 23ff

Behavior states, simulated, in psychobiological research, 237ff
Behavior therapy, symptom substitution in, 221ff
Bennett Award, of Society of Biological Psychiatry, 237ff
Biochemical psychiatry, status of research, 153ff
Books Received, 277

Calcium
  and lithium, 269ff
  and magnesium, 269ff
Civil rights of patients, 183ff
Contingent negative variation
  and anxiety, 43ff, 101ff
  and perceptual mode, 43ff, 101ff
  and sex, 43ff, 101ff
  and stress, 101ff
  temporal characteristics of, 101ff

Diazepam
  mood effects, 31ff
  psychophysiological effects, 31ff
N,N-dimethyltryptamine, failure to evoke tolerance in cats, 213ff
Dipotassium clorazepate
  mood effects, 31ff
  psychophysiological effects, 31ff
Disulfiram, and induced olfactory seizures, 89ff
l-Dopa, response threshold in psychiatric patients, 139ff

Editorials, 1ff, 79ff, 183
Electroconvulsive therapy
  in affective disorders, 147ff
  in neurotic reactions 147ff
  in schizophrenia, 147ff
Electrophysiological phenomena, of S-protein
  in normal subjects, 113ff
  in schizophrenic subjects, 113ff

© 1973 Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011.

Emotionality, effects of frontal ablation, 173ff
Evoked response, and affective disorders, 199ff

Frontal ablation
  effects on alcohol selection, 173ff
  effects on emotionality, 173ff

Human rights and research, 183ff

Inactivity, inheritance of, in pointer dog, 23ff

Lithium
  and calcium, 269ff
  and magnesium, 269ff
  and polydipsia, 167ff
  and polyuria, 167ff

Magnesium
  and calcium, 269ff
  and lithium, 269ff
D-mannose, incorporation of carbon atoms, 3ff
Mescaline, and tolerance to excitatory effects, 129ff
Methamphetamine, induced olfactory seizures, 89ff
Mood effects
  of diazepam, 31ff
  of dipotassium clorazepate, 31ff

Neurotic reactions, predictors of improvement after electroconvulsive therapy, 147ff
News and notes, 75ff, 179ff, 273ff

Olfactory seizures
  and disulfiram, 89ff
  and methamphetamine, 89ff

Patients, civil rights of, 183ff
Perceptual mode, and contingent negative variation, 43ff, 101ff
Phenethylamine
  gas-chromatographic determination, 161ff
  identification of, 161ff
Polydipsia, and lithium, 167ff
Polyuria, and lithium, 167ff
Predictors of improvement after electroconvulsive therapy
  in affective disorders, 147ff
  in neurotic reactions, 147ff
  in schizophrenia, 147ff
Psychophysiological effects
  of diazepam, 31ff
  of dipotassium clorazepate, 31ff

S-protein, and electrophysiological phenomena
  in normal subjects, 113ff
  in schizophrenic subjects, 113ff
Schizophrenia
  predictors of improvement after electroconvulsive therapy, 147ff
  vestibular dysfunction in, 255ff
Schizophrenic subjects, electrophysiological phenomena and S-protein in, 113ff
Serotonergic agents, interactions with amphetamine, 11ff
Sex, and contingent negative variation, 43ff, 101ff
Stress, and contingent negative variation, 101ff
Symptom substitution, in behavior therapy, 221ff

Tolerance, *N,N*-dimethyltryptamine in cats, 213ff

Vestibular dysfunction, in schizophrenia, 255ff
